Professional Objective

A position as Application Development Lead that will capitalize my nearly 12 years experience on IBM i and predecessor platforms.

Primary Skills:

Programming, Data Analysis, Performance Tuning, Application Designer, Software Engineer, AS400, iSeries, RPG, RPGLE Embedded SQL, DB2 UDB for iSeries, DB2/400, SQL Server 2000/2005, SSIS, SSRS, SSAS, ASP.Net 1.1/2.0/3.5, VB.Net, C#, XML, Web Services.

Qualification Highlights

- Effective leader with strong communication skills.
- Excellent analytical and problem solving skills.
- Innovative, creative and timely solutions for complex customer requirements.
- Extensive experience in:
 - evaluating end-user requirements and applying to complex information management solutions.
 - third party system development, application system analysis, design, programming, and technical management on many applications and application categories.
 - Managing and coordinating 3rd party vendors for procurement of software licenses, hardware equipment, maintenance of existing software/hardware etc.
- Works well with users and technical staff to quickly assess and assimilate business requirements, and effectively target resources to critical needs.
- Strictly adheres to client coding, style, and documentation standards on all projects to ensure maintainability and continuity of all code produced.
- Highly Quality conscious and fully knowledgeable of complete Software Development Life Cycle (SDLC).

Computer Expertise

Hardware:

- IBM System i (iSeries, AS/400)
- Windows PC.

Software:

- RPG Free, RPGLE, CL, RPG/400, SQL(DB2 UDB for iSeries), CL, Subfiles, Query, iSeries Access for Windows, DDM, IFS, TCP/IP, FTP, Encryption, MQ Series, Websphere II server, Stored Procedures, Tables, Functions, Views, Info Print Server.
- Performance tuning & monitoring of complex & critical high transaction batch processes.
- Various Database utilities, Websphere, Hawkeye.
- Change management tools like Turnover, Implementer.
- MS SQL Server 2000/2005, SSIS, SSRS, SSAS, ASP.NET, VB.NET, C#, Web Services, XLM, JavaScript, AJAX.

Management Expertise

- Project/technical management
- IT Operations management

Professional Experience

Bank of America (Post Closing Document Custody), Simi Valley CA (Dec 2001 – Present)

(Includes 2 years as a contractor)

Lead Developer

- Currently supervising a team of 3 programmers (1 in India) for 24/7 production support and BAU of Collateral Tracking System on System i and related websites.
- Led a team of 3 programmers in the analysis, design, development, integration and post implementation support of Countrywide Home Loans Collateral Review application on iSeries with Bank of America's review application on SQL Server.
- Led a team of 2 programmers in the analysis, design, development and implementation of Hoppman and PrintBos labeling application on IBM System i.
- Single handedly developed and enhanced the existing Collateral Tracking System for new BPP insurance product and Enterprise Data Standardization project. Both these projects involved changing several hundred iSeries objects with a very small time frame. Both the projects were implemented on time with very minimal issues.
- Coordinated and managed the move of Hoppman labeling m/c from Simi Valley to Ft.Worth, Texas. This Involved coordination with 5 external vendors, several internal departments and complex software changes on iSeries.
- Led the design, development and implementation of FNMA DNC reporting system on iSeries and reporting website.
- Led the design, development and implementation of high transaction Certification transmissions between SQL server and iSeries.
- Designed and developed rule based FNMA Collateral Review application on iSeries. This is complex application that tracks the collateral flow from reception to certification, safekeeping in the vault, releases from the vault, generating CA's etc.
- Led the design, development and implementation of high transaction Routings transmissions between SQL server and iSeries.
- Led the design, development and implementation of Collateral Deficiency reporting system and QC reporting application.
- Planned and supported several DR and Business continuity initiatives for Document Custody Collateral Tracking System on System i.
- Developed Billing application modules on iSeries using MQ Series.
- Developed .NET reporting and maintenance application for the billing modules on iSeries.
- Conducted several training sessions for new comers and cross platform developers.
- Organized meetings with business unit to gather requirements resolve issues and communicate them to the team.
- Made sure to adhere to all the SDLC processes.
- Mentored and trained several junior programmers.

Environment:

Project Lead, Project Management, Vendor Management, IBM System i, OS/400, RPGLE, ILE, RPG/400, CL, DB2/400, Extensive use of DB2 UDB for iSeries, Embedded, SQL, iSeries Access for Windows, Service programs, Activation Groups, IBM Federated Databases (II Server), MQ Series, Journaling, Work Management, Performance Tuning, DDM Communications between several System i servers, ODBC, JDBC, SQL Server 2000/2005, SSIS, SSAS, SSRS, ASP.NET 1.1/2.0/3.5, VB.Net, C#, JavaScript, Web Services (.Net & System i).

Keane Inc. Noida, India

Project Leader/Sr Software Engineer (1998 – 2001)

- Responsible for 4 programmers in the analysis, design, development and technical support of the Custodian Release Request Rewrite (CRRR) project.
- Led a team of 10 members for the Countrywide's Account number expansion project executed from offshore location in India.
- Led a team of 3 members at GE Insurance, Shannon Ireland for their help desk unit supporting CIG/FIG application on AS400.
- Coordinate the offshore team from Ireland, Shannon to support and enhance GE Insurance CIG/FIG application.
- Member of development team for maintenance and enhancement of Countrywide Home Loans Tax application on AS400.
- Prepared PED, Analysis Documents, Test Scripts, Test Plans and UAT scripts for every project executed.
- Organized frequent team meetings to resolve issues, train new comers, motivate the team members.
- Coordinated with onsite team for issue clarification on the ongoing projects.

Environment:

Project Lead, Project Management, IBM System i, OS/400, RPGLE, ILE, RPG/400, CL, DB2/400, Extensive use of DB2 UDB for iSeries, Embedded, SQL, iSeries Access for Windows, Service programs, Activation Groups, IBM Federated Databases (II Server), MQ Series, Journaling, Work Management, Performance Tuning, DDM Communications between several System i servers, ODBC, JDBC, SQL Server 2000.

Education:

- Masters in Thermal Engineering from University of Delhi, Delhi, India.
- PMP Certification from PMI (currently acquiring PDU's for Continued Certification Requirements)
